

# Cybersecurity Competitions

Here is the guide for the workshop on July 21st, 2021. Please review and follow the instructions **prior** to the workshop, as some files may take time to download. This might look daunting, but don't worry! We will go over everything during the workshop, and if you have questions before, please email me at [ccory2004@gmail.com](mailto:ccory2004@gmail.com).

## DOWNLOADS

### VMWare

This is the software we use to load virtual machines. It is free software for Windows and Linux operating systems.

Windows Download link: <https://www.vmware.com/go/getplayer-win>

Linux Download link: <https://www.vmware.com/go/getplayer-linux>

Mac Download link: <https://my.vmware.com/web/vmware/evalcenter?p=fusion-player-personal>

**Need help with installing VMWare Player/Fusion?**

<https://kb.vmware.com/s/article/2053973>

### CyberPatriot Linux Demo

Download the Linux Demo image here:

<https://drive.google.com/file/d/1p1Kjvk1DPbLQoToTsbicYa7CEaxuSvW2/view?usp=sharing>

**This is a very large file (4.4 GB), so please download this ahead of time to ensure it is completely downloaded**

Once it is downloaded, please extract the files out of the ZIP file. That's it!
