

Cybersecurity Competitions

Here is the guide for the workshop on July 23st, 2021. Please review and follow the instructions **prior** to the workshop, as some files may take time to download. This might look daunting, but don't worry! We will go over everything during the workshop, and if you have questions before, please email me at ccory2004@gmail.com.

DOWNLOADS

CyberPatriot Windows Demo

Download the Windows Demo program here:

[https://cp-demos.s3.amazonaws.com/CyberPatriot%2BInteractive%2BDemonstration%2B26%2BApril%2B2021+\(2\).zip](https://cp-demos.s3.amazonaws.com/CyberPatriot%2BInteractive%2BDemonstration%2B26%2BApril%2B2021+(2).zip)

Once downloaded, rename the zip file to a shorter name before extracting.

Once it is downloaded, please extract the files out of the ZIP file. That's it!

CyberPatriot Windows Image

It is not necessary to download this, but it could be useful for you to practice later on. This is a full Windows image that has vulnerabilities which you can remedy.
